Daily Diving Deeper

Appreciating God's Creativity

February 10, 2010

Read Genesis 1:21

“So God created the great creatures of the sea and every living and moving thing with which the water teems, according to their kinds, and every winged bird according to its kind. And God saw that it was good.”

Read Psalm 148:7

“Praise the Lord from the earth, you great sea creatures and all ocean depths.”

You can see the creativity of our Creator in all of the creatures of the sea. From the whale, dolphin and sea turtle to the anemone, lobster and jellyfish—our God’s creativity shines through them all. And just think...there are still creatures yet to be discovered in the depths of the ocean! Even as you sing and learn the songs from the musical you are bringing praise to God in singing of His goodness.

Pray

Father, as we learn the songs for this musical , help us to explore and learn more about Your love for us. We are so grateful for your creation and we bring praise to you today. May all creation come to praise Your Holy name. We Love You! In Jesus’ name, Amen!

take a look at life in 3D

3D stands for
“3 dimensional.”

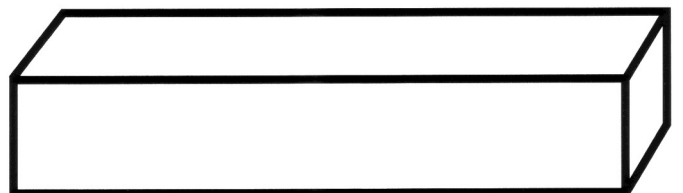

Something drawn on
a piece of paper is flat,
making it a 2-dimensional
image. This rectangle
has length and height,
but no depth.

take a look at life in 3D

3D stands for
“3 dimensional.”

A 3-dimensional image
has depth as well,
making it look
more life-like.

take a look at life in 3D

For the characters
in the musical to
“take a look at life in 3D,”
they are going to go
into the depths of the ocean
to see the creatures.

supersonic submarine

When you ride in the car,
your car travels anywhere from
1 mile per hour
(which feels REALLY slow)
to 75 miles per hour
(which feels pretty fast).

The word “supersonic” refers
to the speed of something.

When you hear a sound,
it has to travel to your ears.

The speed of sound has been measured
to be about 767 miles per hour—
a lot faster than your car is even
capable of going. Something that is
“supersonic” travels even FASTER
than the speed of sound! WOW!

A supersonic submarine is basically
one incredibly fast submarine!
